

Release Notes

Version 3.1 - Aug 2019

We're pleased to share the latest PowerNav developments with you - stay tuned for more new enhancements coming soon.

Features: Route Filters, Directions List, Improved Language Support and Kiosk Mode

Kiosk/Web Mode

PowerNav Kiosk enables users to access digital wayfinding from a static device, such as an iPad or existing kiosk located at the entrance to your facility, or via a web browser on a home computer.

PowerNav Kiosk presents the same branding and functionality as the app, providing directions to all visitors, including those who do not have PowerNav downloaded to their phone.

Users can look up directions on the kiosk, scan a QR code on the screen and continue their journey viewing the directions on their phone. Directions can also be printed to PDF for reference or to send to other users.

PowerNav kiosk allows users to access digital wayfinding from a home computer or a static location within your facility.

Accessibility and Maintenance Routes

PowerNav supports route filters and so that you can customise accessibility and maintenance routes within your facility in response to specific user needs and organisational events.

For example:

- Specify a wheelchair friendly course, or conversely, mark a route that is wheelchair inaccessible
- Recommend an undercover route for the comfort of your users
- Close off an area of the facility while maintenance or construction is in progress.

Customise accessibility and maintenance routes

Directions List

The directions list presents an alternative format to the traditional map layout, providing a set of wayfinding instructions in an ordered list with clear, directional arrows for easy reference.

The user's device will vibrate to alert key changes of direction, and can be used with audible directions for the vision impaired.

PowerNav Directions List can be used with audible instructions

Additional Language Support

PowerNav directions can now be translated into 12 different languages, supporting a multi-cultural community.

Available languages are:

- English
- Chinese
- Filipino
- French
- German
- Greek
- Malayalam
- Romanian
- Russia
- Malay
- Sinhalese
- Spanish

PowerNav now supports 12 languages
